

Introducing significant enhancements in the viewing, annotation and collaboration paradigms.....

Viewing Support Enhancement

- **Added File Format Support:** The eReview Viewing Engine Framework has been extended to add support of the following File Formats:
 - AutoCAD 2007
 - MS Office 2007
 - Open Office Support
- **Downloading Selected Viewing Components:** There is now a provision to download selected viewing components to the client. This eliminates the downloading of any unnecessary components to the client machine

New Features in eReview Viewer

- **"Snap-to"** support for measurement in HPGL and DWF
- **Server side viewer framework enhanced** to handle very large PDF and TIFF file. With this enhancement, a 500MB multiple page tiff file with 1000 pages loads in 10 seconds and a 2000 page PDF document loads in 5 seconds
- **Overlay Compare** feature improved to support overlay of multi-page documents

New Features in eReview Annotation

- New Erase markup mode for **redaction** of confidential and sensitive information
- Easy mechanism for combination of set of primitives to create **customized (composite)** markups, stamps and clipart/icon images
- Addition of Library of **lite markups** (exclamation, question marks, approve, reject)

Printing Enhancement

- **EMF (Enhanced Metafile)** technology enabled to enhance DWF printing
- **Redacted viewing and printing** introduced

Enhancements in Collaboration

- Options introduced to **save and load markups created on whiteboard**
- **User Pointer** to locate different viewing section in an online meeting

- Load documents with **redaction files auto-loaded** in document collaboration mode
- **Color assignment** for each specific user

Custom Tool Buttons in eReview Applet

- Provision introduced to allow the user to add external actions to his own tool buttons. Users can add their own custom stamps, images, approval stamps to the markup toolset

API Enhancement

The API Toolkit has been enriched with APIs that can handle the following functionalities:

- Load documents with confidential and sensitive data pre-redacted
- **Load OverlayText as text stamp**
- **Overlay** documents for comparison
- Save PDF rendition of document on server through URL request
- **Control of document rotation through server-side parameter DOC_ROTATE**

Enhancements in eReview Integrations

eReview already had ready integrations with a number ECM PLM PDM ERP and CRM solutions. Here are the latest additions:

- FileNet Workplace 4.0 XT
- FileNet ISRA
- Application Connector for SAP(ACSAP)
- ASP.Net Web Application Integration
- Oracle/Siebel 8.0

New Server-side Parameters

New configuration parameters have been added to:

- Create of history log on the server
- Edit and reset zoom percentage values that get reflected in the zoom combo-box
